Experience

Intern Python/Django Developer - 02/2024 to Present

Itonix Technology PVT LTD., Ahmedabad.

- Investigating, designing, and implementing scalable applications aimed at enhancing data identification, analysis, retrieval, and indexing processes.
- Collaborating closely with cross-functional IT teams to conceptualize, plan, and develop tailored software solutions aligned with client needs.
- Estimating and optimizing interface functionalities between hardware and software components to ensure seamless integration and performance.
- Engaging in iterative software design and development practices, prioritizing client requirements and maintaining a strong focus on quality assurance.
- Facilitating effective communication and collaboration across departments, liaising with business analysts, developers, and technical support teams to define and refine project specifications for optimal outcomes.

Intern Angular Developer - 07/2023 to 01/2024

AVJ Software, Ahmedabad

- This experience entails working as a trainee or apprentice specifically focused on Angular development—a popular JavaScript framework for building dynamic web applications.
- Responsibilities typically include assisting in the development and maintenance of Angular-based projects, collaborating with senior developers, troubleshooting issues, and gaining practical exposure to software development methodologies.
- This experience demonstrates the candidate's hands-on engagement with Angular development within a professional environment, contributing to their overall skill set and readiness for more advanced roles in software development.

Education

Bachelor of Computer Engineering - **2023**
Gujarat University, Ahmedabad.

Higher Secondary Education - **2020**
Gujarat-Board, Ahmedabad.

Projects

1. Find Fragrance Perfumes

Role: Co-developer

Team Size: 2 members

Technologies Used: Python, Django, HTML, CSS, JavaScript, dbSQLlite

Description: Developed a comprehensive perfume selling website using Python Django framework. Collaborated closely with a team of two members to design, develop, and deploy the platform, ensuring seamless functionality and user experience. Implemented features such as product catalog, user authentication, shopping cart, and secure payment processing. Utilized Django's built-in functionalities and libraries to optimize performance and enhance scalability. Successfully delivered a fully functional e-commerce solution meeting client specifications and requirements.

2. Black Raaven Fashion

Role: Python-Django Developer

Team Size: Solo

Technologies Used: Python, Django-Rest Framework, HTML, CSS, JavaScript, dbSQLlite

Description: Developed a E-commerce Project using Python Django framework with Django Rest Framework for API development. Built the entire project independently within a one-month timeframe, from conceptualization to deployment. Implemented features such as [mention key features or functionalities]. Leveraged Django Rest Framework for efficient API development and integration. Ensured code quality, performance optimization, and adherence to best practices throughout the development lifecycle.

3. Shreeji Polytech Website(shreejipolytech.com)

Role: Front-end Developer

Team Size: Solo

Technologies Used: HTML, CSS, JavaScript, Bootstrap

Description: Designed, developed, and deployed a comprehensive website for Shreeji Polytech, a company specializing in manufacturing and selling PVC furniture items. Developed the website independently, handling all aspects of design, development, and deployment. Optimized the website for performance and search engine visibility to enhance online presence and attract potential customers. Collaborated closely with the client to understand requirements and incorporate feedback, ensuring the website met their expectations.

4. Current Project : Royal Monarch IT Consultancy – Interview Scheduling Platform

Role: Front-end Developer

Team Size: Solo

Tchnologies Used: HTML, CSS, JavaScript, Bootstrep

Description: Spearheading the development of a comprehensive interview scheduling platform for Royal Monarch IT Consultancy, a USA-based company specializing in IT consultancy services. Working independently on all aspects of the project, including requirement gathering, design, development, and client communication.
